

Downtown Construction Activities

Proposed work activities for the week of August 22nd, 2021

- The contractor at the Generals Bridge project will continue installing new masonry veneer, concrete sidewalks, plinth street lighting and barricade fencing. The Thomas Burgin Parkway north bound lane on the west side adjacent to the bridge remains closed. Traffic is reduced to one lane in either direction with the concrete barricades on the sides. Vehicular traffic should use caution when entering this area.
- At the McConville Way project the contractor will continue construction of the catenary lighting, waterproofing, and dumpster enclosure fencing in the alleyway between the 1495 and 1500 Hancock St buildings. At the future pocket parks, the contractor will continue install of security cameras, communication equipment, Wi-Fi transmitters and begin the install of various art pieces.
- Work continues along the face and above the existing 25 Temple St building for the new structural steel that will support the future addition. Currently, the sidewalk along Temple St at the building remains open during construction. The contractor will begin installing the new prefabricated structures above the existing building in the next few weeks.

(The photo on the above left shows the construction of the north concrete sidewalk at the General's Bridge. The above right photo shows the contractor applying waterproofing at the south face of the 1495 Hancock St building within the alleyway.
